CONCRETE SEATING PODS - PBN407

This stunning new building funded through BSF at £25 million provides state-of-the-art facilities and fantastic learning resources for students and the community. We provided bespoke wall mounted benches and seats in FSC hardwood to many areas including the amphitheatre. For social areas we provided concrete cubes and "Y" benches and on the re-cycled plastic decking our plinth mounted benches worked perfectly as no fixing was required. The cycle parking with stainless steel hoops gives a quality feel to the whole project.
