

SPG320

SPG320

Loxdale Primary School located in Bilston Urban Village is part of City of Wolverhampton's school expansion plans. With 500 homes being built across the Urban Village site, the school helps to meet the extra demand for education places in a new purpose built facility within the wider development. Offering excellent facilities to its new pupils, Loxdale will play a key part in the Urban Village's wider regeneration goals, bringing homes, jobs, and 14 hectares of land designated for public open space & nature conservation.

Langley Design worked with Bowmer + Kirkland to design, manufacture and install our popular Sheldon Canopy SPG320. Produced in a Class 4 Treated Redwood with galvanised steel columns, our Sheldon range of canopies offer vital external coverage to the school environment. Whether providing classroom breakout space, external dining provision or simply additional space for the children to socialise and enjoy the British weather, Langley offer a flexible approach with bespoke design and production capabilities to ensure we provide the right product and the right price for your project requirements.
