Carillion Construction

St. Cuthbert's is an 11-16 voluntary aided Business & Enterprise College providing a Catholic education for pupils in the Rochdale area. In January 2014 the new building was opened with a modern fresh feel to the development. Subsequently the external area needed to have tables and benches installed. To match the modern sleek lines of the building a hardwearing and appropriate material was required, we met the requirement with our grey granite plinth and stainless steel units from the Malford range. These items could be set out on the existing tarmac with no foundations being required in a quick and cost effective process that took less than a day to complete.
