**Interserve Project Services**

SUPPLY +  
INSTALL

One of the schools in Leeds BSF, we worked with Interserve to provide a high level of tough, hard wearing products. The design included triangular tensile fabric canopies for shade in the summer months. Our SPG308 was made to fit the bill at a sensible cost. For low maintenance benches, litter containers, picnic tables, teaching stations in a combination of galvanised steelwork and recycled plastic slats.
