**SKY BLUE DOOR BARRIER - MDB202**

**AGATE GREY DOOR BARRIER - MDB202**

**PATINA GREEN DOOR BARRIER - MDB202**

**MDB202**

Marlborough St Marys CE Primary School in Wiltshire opened its doors in 2017 and Langley Design were chosen to provide various street furniture items. Working with Kier, Langley were tasked with providing door barriers that are galvanised and powder coated to match certain elements of the project. Some barriers had to match the door colours and others the window frames. Liaising with both the architect and contractor the correct RAL colours were chosen and this enabled the impressive visual which you just don't get from galvanised only door barriers. We also manufactured and installed our Sheldon timber cycle shelter to provide cycle parking facilities for the students. This has since been used to keep planters and other building materials under.
