INSTALL

This elegant school with its courtyards and modern material palette, chose our stainless steel Malford benches and picnic tables. In the original build these benches were directly embedded, it was always hoped to provide additional benching once the budgets were available. We were able to provide curved benches on free standing granite plinths in the play areas to create social hubs. As no foundations are necessary with our plinth products these were easily and cost effectively placed in the autumn half term.
