SHELDON PICNIC TABLES - SPT306

SHELDON CYCLE SHELTER - SCS302

Albion Primary School is situated in the heart of Rotherhithe, a peninsula on the south bank of the Thames and is in the London Borough of Southwark. The school was completely revamped in order to increase capacity to a full two-form entry facility.

As specialists in the education sector, Langley Design worked with Morgan Sindall to manufacture and install an extensive amount of street furniture to fill the newly landscaped areas. The school made the best possible use of the outdoor space by creating a bicycle track, new playground and a special school growing garden. Langley Design's extensive product range allowed Morgan Sindall a one stop shop to procure items such as cycle shelters, planters, pergolas, picnic tables, benches and cycle/scooter parking facilities.

The timber products tied in beautifully with the landscaping and provided an aesthetically pleasing solution at this new state-of-the-art education facility.
