SHELDON BENCH - SBN310

Bridge Hall Primary School in Stockport is another school we worked on with Morgan Sindall to provide a range of street furniture products. We were able to offer a one stop shop for the street furniture products required. We helped design a range of products that were consistent across the site, our customer first approach allowed us to identify costs savings for the client whilst using products that allowed for a great synergy across the project. Our products included bins, planters, plinth mounted recycled plastic benching and cycle shelters.
