Langley Design worked with BAM at Avanti Fields School which is one of three new schools built in the East Midlands with a combined value of £65m. Avanti Fields is an all through Hindu faith school with a pupil capacity of 1,300 serving the Leicester community. Langley Design were tasked with providing the schools street furniture package, which included seats & benches, door & vehicle barriers, planters and steel cycle shelters. Offering a range of cycle shelters we were able to provide suitable storage solutions that allowed either easy open access or a secured gated provision. As a bespoke manufacturer Langley can provide flexibility to each projects individual needs, installing two large classroom canopies for the school in a galvanised and powder coated finish to match the colour scheme of the building as well as producing a 5x5m tensile umbrella for the students to dine, socialise and study under.
